1. Executive Summary

1.1 Registration - 1 June 2016 to 31 July 2016

As forecasted, the team received an increase in UK applications received due to the new graduate period. We also saw a lower volume of calls to the department than forecasted. The team achieved all of the department's service standards, with the exception of answering 95% of telephone calls received for UK telephone calls, and UK and international email responses. Response times to emails were adversely affected by the increase in volume for international emails and higher than expected sickness absence. This also affected the service levels of telephone calls.

1.1.1 Telephone Calls

The team experienced an overall decrease of 1,702 less calls received than we had forecasted during this period.

1.1.2 UK Applications

The team received 870 less UK applications than forecasted.

1.1.3 International Applications

The team registered 50.8% more international applications compared to the same period last year, and 61.2% more than forecast.

1.1.4 Registration Renewals

In this period we had three professions renewing their registration. The renewal window for dietitians closed on 30 June 2016 and the renewal window for chiropodists / podiatrists and hearing aid dispensers closed on 31 July 2016. There was an increase in registrants using the online portal to renew their registration. All renewal forms received were processed within three working days of receipt.

1.1.5 Registration appeals

The appeals reports now follow the same layout as UK and international applications; current workload, appeals received each month, and decisions reached each month.

1.2 Project management

During this period:

- 1 project has entered closure
- 2 projects have declined in outlook; and
- 3 projects have remained the same; and

The Education project has entered closure following the release of the integration functionality enabling communication between the Education system and both Net Regulate and the HCPC website.

The PCI / DSS credit card standard project has declined in outlook due to lack of availability of the supplier to provide further information on the actions required.

The Professional Qualifications Directive project has declined in outlook due to a lack of clarity relating to EU legislation.

1.3 Business Process Improvement

The next external ISO9001:2008 audit will take place over two days (October 18th & 19th) and will cover Registrations, Secretariat, and Communications. The next major item of interest for the auditor will be how the Strategic Intent maps to the Risk Register.

1.4 Facilities Management

The re-organisation of the Office Service Department continues. The Office Services Manager post has been filled. The post of Reception Manager is due to be advertised in the next 2 months.

2 Registration Management Commentary

2.1. Operational performance 1 June 2016 to 31 July 2016

a) Telephone calls

During this period there were three professions in renewal. We experienced the incoming call spikes that we typically expect during the end of a renewal period and the registrant's receipt of various renewal notices.

i) UK telephone calls – During this period the team received a total of 19,646 telephone calls. This is 1,261 (or 6.9%) more than the same period two years ago, and 1,554 less than forecast. The team answered 94.6% of calls received compared to 97.6% during the same period two years ago.

ii) International telephone calls – During this period the team received a total of 1,527 telephone calls. This is 312 more than the same period last year and represents a 25.7% increase in calls. The team answered 98.7% of calls received compared to 99.6% during the same period last year.

b) Application processing i) UK applications

A total of 4,057 UK applications were received during the period which is 870 (or 17.7%) less than forecasted. We received 401 (or 9%) less UK applications compared to the same period last year.

The team registered 3,655 UK applications which is 1,148 (or 23.9 %) less than forecasted.

The team processed all UK applications within ten working days.

ii) Readmission applications

The team processed all readmission applications within eight working days.

iii) International applications

A total of 1,057 new international applications were received which is six (or 0.6%) less than forecasted.

We received 154 more international applications compared to the same period last year which represents a 17.1% increase.

The team registered 674 applications which is 227 (or 50.8%) more compared to the same period last year, and 61.2% more than forecast.

The team acknowledged receipt of applications within three working days on average during this period for both European Mutual Recognition (EMR) and Non-EMR applications. The team are currently processing both Non-EMR applications and EMR applications within 32 working days of receipt.

iv) Visiting European health professional declarations

The team received 60 declarations which is 53 (or 46.9%) less compared to the same period last year. The number of registered visiting European health professionals for the same period last year has increased by 8.6% to 354, which is 11 less than the forecast of 365.

v) European Professional Card (EPC)

The European Professional Card (EPC) for physiotherapists has been operational since 18 January 2016.

We continue to receive more interest from physiotherapists who either want to go and practise elsewhere in the European Economic Area (EEA), or who wish to come and practise physiotherapy in the UK.

In the period we received:

- 11 EPC applications from those who are registered with us (or have approved UK qualifications) and wish to practise in another European state,
- 18 EPC applications from physiotherapists qualified in other European states who want to establish themselves in the UK and use the protected title,
- And 6 EPC applications from visiting physiotherapists, who wish to practise in the UK on a temporary and occasional basis.

Seven outgoing EPC applications have been successfully transferred to another member state during the period.

From those who want to use the title physiotherapist and establish themselves in the UK, five were returned due to being incomplete, 12 had their qualifications recognised and the rest are ongoing. During the period, 4 EPC applications have been added to the Register of visiting professionals. Please note that these are registered for 18 and not 12 months, when compared to visitors applying via the non-EPC route.

c) Emails

i) UK Emails – A total of 5,213 emails were received which is 254 (or 4.7%) less than the same period in 2014. The team responded to 71.7% of UK emails within one working day and 94.0% within two working days.

ii) International emails – A total of 2,949 emails were received which is 1,992 or 208.2% more during the same period last year. There continues to be a considerable increase in the number of emails received since the website was updated in October 2015, promoting the international email address more clearly.

The levels of unexpected sickness absence attributed to the number of emails that were processed outside of service level.

d) Continuing Professional Development (CPD) audit

A total of 415 CPD profiles were received during this period and all profiles were acknowledged within one working day. All complete CPD profiles are being processed within 60 working days of receipt.

During this period one assessment day was held and a total of 537 CPD profiles were assessed of which 15 CPD profiles were sent to assessors to be assessed electronically.

e) Registration renewals

The renewal window for dietitians closed on 30 June 2016 with 96.7% successfully renewing their registration.

This is 0.1% more than 2014 when 96.6% of dietitians renewed their registration. Of those who successfully renewed, 95.1% renewed their registration using the online portal. This compares favourably with 2014 where 89.9% of dietitians renewed their registration using the online portal, an increase of 5.2%.

The renewal window for chiropodists / podiatrists closed on 31 July 2016 with 96.7% successfully renewing their registration. This is 0.5% less than 2014 when 97.2% of chiropodists / podiatrists renewed their registration. Of those who successfully renewed, 88.4% renewed their registration using the online portal. This compares favourably with 2014 where 81.7% of chiropodists / podiatrists renewed their registration using the online portal, an increase of 6.7%.

The renewal window for hearing aid dispensers closed on 31 July 2016 with 94.7% successfully renewing their registration. This is 0.3% less than 2014 when 95% of hearing aid dispensers renewed their registration. Of those who successfully renewed, 90.8% renewed their registration using the online portal. This compares favourably with 2014 where 85.6% of hearing aid dispensers

renewed their registration using the online portal, an increase of 5.2%. All complete paper renewal forms were processed within three working days of receipt.

f) Postal correspondence

On average, the team processed postal correspondence within seven working days of receipt.

g) Registration appeals

During the period the team received six new registration appeals, which is two or 25% less than forecast.

A Registration Appeal Panel considered a total of four appeals, determining that the appeal should be dismissed in three cases and remitted back to the Education and Training Committee in one case.

The registration appeals team actively managed and progressed 17 cases during the reporting period.

2.2 Resource Employees

During the period we successfully recruited five new Registration Advisors, two of which are on fixed term contracts. These positions backfill vacancies that we had following promotions, leavers, and secondments. Training continues to be provided to employees as part of our multi-skilling training programme.

The department operated within its budgeted headcount during this period.

2.3 Registration department service standards:

a) The Registration Department aims to answer 95% of all telephone calls.

b) The Registration Department aims to respond to all UK application requests within ten working days of receipt. We aim to process all **complete** UK applications within ten working days of receipt, or inform the applicant within ten working days if their application is **incomplete**.

c) The Registration Department aims to process all **complete** readmission applications within ten working days.

d) The Registration Department aims to verify completeness of all International applications and acknowledge receiving the application within five working days of receipt.

The Registration Department aims to process **complete** applications within 60 working days of receipt.

e) The Registration Department aims to respond to 80% of all emails within one working day and all emails responded to within two working days.

f) The Registration Department aims to acknowledge receipt of CPD profile applications within five working days.

The Registration Department aims to process all **complete** CPD profile within 60 working days of receipt.

g) The Registration Department aims to renew the registration of a registrant with active direct debit set up, within ten minutes of the registrant completing their renewal online account.

The Registration Department aims to process all complete paper renewal form within ten working days of receipt.

h) The Registration Department aims to process postal correspondence within ten working days.

2.4 Registration Management Statistics

Number of Registrants by Profession April 2015 - March 2017

Registration Department

NOTE: Information captured on the last day of each calendar month.

Forecast is based on the average percentage difference in number of registrants from 10/11 - 15/16.

International applications workflow process at end of each month April 2015 - March 2017

Registration Department

NOTE: Information covers international applications status progress only.

Total

Represents the current workload within the international section as at the end of the month.

The ISO 9001:2015 Quality Management System Standard was released in September 2015. The new version of the standard is more risk focused, and Preventive Action part of the standard has been removed. The different clauses more closely align with the ISO27001 standard, and all new standards should follow the same overall organisation

The **ISO 9000** group of quality management system standards is designed to help organisations ensure that they meet the needs of customers and stakeholders whilst satisfying statutory and regulatory requirements related to the product or service provided.

Third-party certification by external auditors (British Standards Institute, BSI, in our case) provides independent confirmation that HCPC meet the requirements of ISO 9001; 27001; 10002 standards.

A programme of internal and external audits based around departmental function, across functions or on a risk based approach is carried out on a rolling basis to maintain quality of service and incremental improvements over time following a Plan – Do –Check – Act review cycle.

Scanning and secure print suppliers are being visited over the summer, to provide assurance of rigorous adherence to the standards we require when going through procurement. The destruction of hard disk drives from redundant PC's and laptops, prior to recycling of the remaining hardware components was also audited.

4.2 Near Miss Reporting

REPORT NUMBER	TARGET DRAFT TO SPONSOR	TARGET DATE TO FINALISE WRITE UP	TARGET DATE TO EMT
NMR59 Suspended Registrant removed in error	July 2016	August 2016	August 2016 Sept 2016
NMR60 Suspended Panel member	July 2016	August 2016	August 2016 - Completed

4.3 ISO9001 Audits & updated processes

The next external ISO9001:2008 audit will take place over two days (October 18th & 19th) and will cover Registrations, Secretariat, and Communications. The next major item of interest for the auditor will be how the Strategic Intent maps to the Risk Register. This has been applied and risks relating to the delivery of the strategic objectives listed.

The new ISO9001:2015 standard will be adopted when time allows, following migration of the Quality Management System and Information Security Management System to a Microsoft SharePoint based system. This is linked to the Intranet SharePoint project.

4.4 ISO10002 Audits & updated processes

HCPC achieved certification to IS01002:2014 Customer Satisfaction Management system, standard after a relatively rapid project using a combination of internal and external resource since May 2015. The BSI report was presented to the Audit Committee.

4.5 Corporate Risk Register Maintenance

Register iteration	Draft circulated to EMT	Collecting updates	EMT sign off	Published to Audit Committee
2016 September	June 2016	June 2016	August 2016	Sept 2016
2017 January	Dec 2017	Not yet commenced	January 2017	Not yet commenced

The Risk Register has been slightly extended to function as the Risk Treatment Plan for ISO27001. Strategic Objectives are being mapped to individual risks.

4.6 Registrant Number Forecasting

Forecast iteration	Draft circulated	Collecting updates	EMT sign off	Published to Council
2015 June, brought forward to March 2015	Completed	Completed	Completed	Completed
2015 September update	July 2015	August 2015	Sept 2015	Sept 2015
2016 January early budget version (based on Rf9)	January 2016			
2016 June	April 2016	May/June 2016	May/June/July 2016	July 2016

4.7 ISO27001 Information Security Implementation

Internal audits based around ISO9001:2008 and ISO27001:2013 continue around the organisation. Audits have been combined where possible to lower the impact of repeat auditing on departmental resources.

Information Security training started in July within the departments. HCPC Partners and Council Members will be trained from the September onwards, on specific modules.

4.8 Business Continuity / Disaster Recovery Planning

The Shadow Planner site is being maintained with content. The Shadow Planner smartphone version (known as "Plan in a Box") has been tested and is fast and user friendly. The IT Department have started supplying the Android devices to use as company phones and access the DR/BCM plan. A draft plan test scenario and testing date have been selected for November 2016.

		are provided below illustrating how the plan	1 looks on the devices.	08:53

A pair of screen shots are provided below illustrating how the plan looks on the devices.

As the employees on the DR plan circulation list are provided with the smartphone devices and online plan access we will collect the old red files in as these will become increasingly redundant.

4.9 Information & Reporting Activity

The graph below shows current carton/box numbers within the archive system, (2014 June to June 2016). Registrations storage is being assessed to validate scanned copies before hard copy destruction. Some items are currently out for inspection by the registration department, at the new Service Point / Paragon secure warehouse. Hard copy destruction, following signed off, tested scanning is being considered in the Registrations department. A visit to the mine occurred in May. Content was in good condition. Spot checks on location of cartons were good. FTP, Registration and BPI, checked retention schedule adherence and cataloguing of the archive.

5. Office Services Report

Services provided include Reception, Building Maintenance, Post Room, Health & Safety and Building Project Management.

5.1. Organisation of Office Services Department

The re-organisation of the Office Service Department continues. The Office Services Manager post has been filled by James McMahon. James was an internal candidate who previously worked in IT Department. We have also filled a recent vacancy for one of our two Facilities Officer positions.

The post of Reception Manager is due to be advertised in the next 2 months and is presently vacant.

The current structure of the Office Services Department is as follows:

5.2 Incoming Mail including Special Delivery Volumes 2015 / 2016
