

## **Introduction**

For most sets of Standards the Council (and Committee) is following the pattern of an overarching common framework, which will be the actual statutory document in compliance with the HPO, supported by (uni-)professional interpretational guidance.

## **Operating Manuals**

The operating manuals will, in effect, be the interpretational guidance (together with cross-references to procedural notes elsewhere).

## **Education and Training**

The existing / previous documentation can be adapted and reformatted to align to the Standards of Education and Training once the Committee agrees the strategy.

Please note in this context that the outcomes from approved education and training provision will be taken to be the Subject Benchmark for the relevant profession and equivalent documentation for the time being for the other three Parts of the Register.
