Executive summary

The Health Professions Council (HPC) approve educational programmes in the UK which health professionals must complete before they can apply to be registered with us. The HPC is a health regulator and our main aim is to protect the public. The HPC currently regulates 15 professions. All of these professions have at least one professional title which is protected by law. This means that anyone using the title 'Physiotherapist' must be registered with us. The HPC keep a register of health professionals who meet our standards for their training, professional skills, behaviour and health.

The visitors' report which follows outlines the recommended outcome made by the visitors on the ongoing approval of the programme. This recommended outcome was accepted by the Education and Training Committee (Committee) on 22 February 2012. At the Committee meeting on 22 February 2012 the ongoing approval of the programme was re-confirmed. This means that the education provider has met the condition(s) outlined in this report and that the programme meets our standards of education and training (SETs) and ensures that those who complete it meet our standards of proficiency (SOPs) for their part of the Register. The programme is now granted open ended approval, subject to satisfactory monitoring.

Introduction

The HPC visited the programme at the education provider to consider major changes proposed to the programme. The major change affected the following standards - programme admissions, curriculum, practice placements and assessment. The programme was already approved by the HPC and this visit assessed whether the programme continued to meet the standards of education and training (SETs) and continued to ensure that those who complete the programme meet the standards of proficiency (SOPs) for their part of the Register.

This visit was part of a joint event. The education provider validated the programme and the professional body considered their accreditation of the programme. The visit also considered the following programmes - BSc (Hons) Dietetics, BSc (Hons) Paramedic Science and Foundation Degree in Paramedic Science. The education provider, the professional body and the HPC formed a joint panel, with an independent chair and secretary, supplied by the education provider. Whilst the joint panel participated in collaborative scrutiny of all the programmes and dialogue throughout the visit; this report covers the HPC's recommendations on this programme only. Separate reports exist for the other programmes. As an independent regulatory body, the HPC's recommended outcome is independent and impartial and based solely on the HPC's standards. Separate reports, produced by the education provider and the professional body, outline their decisions on the programmes' status.

Recommended outcome

To recommend a programme for ongoing approval, the visitors must be assured that the programme meets all of the standards of education and training (SETs) and that those who complete the programme meet our standards of proficiency (SOPs) for their part of the Register.

The visitors agreed to recommend to the Education and Training Committee that a condition is set on the programme, which must be met before the ongoing approval of the programme is reconfirmed.

The visitors agreed that 56 of the SETs have been met and that conditions should be set on the remaining SET.

Conditions are requirements that the education provider must meet before the programme can be recommended for ongoing approval. Conditions are set when certain standards of education and training have not been met or there is insufficient evidence of the standard being met.

The visitors did not make any recommendations for the programme.

Recommendations are observations on the programme or education provider which do not need to be met before the programme is recommended for ongoing approval. Recommendations are normally set to encourage further enhancements to the programme and are normally set when it is felt that the particular standard of education and training has been met at, or just above the threshold level.

Conditions

6.11 Assessment regulations must clearly specify requirements for the appointment of at least one external examiner who must be appropriately experienced and qualified and, unless other arrangements are agreed, be from the relevant part of the Register.

Condition: The programme team must include a clear statement in the programme documentation that at least one external examiner for the programme will be from the relevant part of the register or that other arrangements will be agreed.

Reason: In the documentation submitted by the education provider there was insufficient detail concerning the registration status of an external examiner in the external examiner recruitment policy specific to the programme. The visitors were satisfied with the current external examiner arrangements for the programme but need to see evidence that HPC requirements regarding the external examiner on the programme have been included in the documentation to demonstrate this standard continues to be met.
